Bachelor of Science (BSc), Applied Science, 1999

Hemakumar kakaraparti

Manager Experience Development at Sapient

4 person has recommended Hemakumar

"Hema, as we fondly call him, is a great web development lead who was my partner in the PD side, who always put customer first in all the engagements that I interacted with him. He was always approachable and always putting himself up for all the challenges that we were able to throw up at his team from the Product team. Very detail-oriented and always delivers on commitment, even it meant going beyond and above what was asked of. Very dependable person and his peers loved him for his leadership."

— **Karthikeyan Janakiraman**, worked directly with Hemakumar at PayPal

"Hemakumar is the one stop shop for all of the Merchant Solutions User Interface Engineering queries. Still cherish the days that we have worked together to solve many of the live site Issues. His technical prowess combined with the domain knowledge that he gained at PayPal & his earlier assignments almost demanded his presence in all of the TDD review / Test case review / Product demos to help teams to identify important use cases that were left out unintentionally. He was a very good mentor for many of the engineers who joined User Interface team."

— **Prasanna Gunavardhanan**, worked directly with Hemakumar at PayPal

"I don't think you'll ever find a more focused and harder worker than Hemakumar. His dedication to any task at hand is second to none. I worked with Hemakumar on a high profile project here at PayPal; Hemakumar was very pleasant and always delivered above and beyond with flying colors. I would recommend Hemakumar in a heart-beat."

— **Rakesh Patel**, worked directly with Hemakumar at PayPal

"I have worked with Hemakumar for lot of projects. He was the UI / Web engineer and never let the team down. I was amazed by his domain knowledge and his ability to go beyond. Must have in any team !!"

— **Milind Makwana**, worked with Hemakumar at PayPal
