

# Mani P S

Associate developer at SAP Labs India Pvt. Ltd. - Core Platform ABAP Server

---

## Experience

### **Associate Developer at SAP**

March 2017 - Present (1 month)

### **Scholar at Core platform ABAP server at SAP**

August 2015 - March 2017 (1 year 8 months)

Starting with a pure maintenance component, I've grown in the team to achieve a level of trust and credibility that sees me managing the legacy ABAP component, alongside development of a key-user tool for S/4 Hana using SAP Fiori.

My job requirements have given me experience in Design, development, testing and maintenance.

I am also responsible for build management in the team and Fiori release coordination.

As add-ons, I have been involved in the ideation, design, development and presentation of many innovative PoCs.

I see my year of work here having transformed me from a fresher straight out of college to a professional with the discretion of balancing effort estimates with tasks in hand to provide customers and other stakeholders with the best products practically possible in the given time frame, complete in quality and features.

## Projects

### **GUI based election system**

January 2014 to Present

Members: Mani P S

Designing, implementing, testing and deploying.

Subject to volatile requirements from my fellow organizers and a time frame of 1 working week.

Used the window builder tool (eclipse) to develop the GUI and a mysql database for storage of candidate details. Candidates could register for the election anytime before 1 hour to the start of election and this addition was also dynamic. This was deployed and worked successfully at the Farewell party organized for the outgoing batch.
