App also using Appium and Junit/TestNG test cases.

April 2015 – April 2016 : Afaria On Premise (Web Portal) Automation using .Net Selenium Framework and
Nunit Test Cases

Dec 2014 – March 2015 : Mobile Secure (Web Portal) Automation using Java Selenium Framework and Junit
Test Cases

Summary

To work with an organization and/or a project where there are endless opportunities to learn and contribute in
the best way.

Volunteer Experience

Placement Coordinator at   UVCE

March 2013 - June 2014

Being an integral part of one of the most active bodies in the college provided me the exposure and the
opportunity to interact with the students of the college and industry professionals. We were a team of 11,

who were solely responsible for all placement related activities. Balancing our studies/ placement preparation and running a full fledged Placement cell (to help others) taught us a lot in a span of one year.

We as a team had to face many challenges to make sure maximum number of our students were placed in most reputed companies. Interacting with the industry professionals and conducting the placement activities imbibed a professional work attitude in us right from the college days. Interacting with the fellow students and there praise for our work taught us to be humble and work harder.

It taught me the value of Teamwork, Time and Temperament. A responsibility which I was more than happy to handle and something which I will remember forever.

Placement Volunteer UVCE for TCS Campus Recruitment at   Placement Volunteer, UVCE
September 2012 - Present

My role as a Placement Volunteer for TCS Campus Recruitment was to make sure the entire recruitment process was smooth. As a pre final year student, this came as an opportunity to learn about the placement process (a process which I had to face the very next year), interact with seniors and the company employees.
