3 people have recommended Sujith

"Sujith has always been the mature, responsible and dependent member in my team at Sapient. His calm and meticulous way of working even in the most complex situations at the client office has been his most important positive point. Planned, organized and dedicated to his goals he has grown in the organization from a new joining team member to a person whom people go to for advise. Project related work, additional initiatives or any special assignments he has always been active to take up responsibility and deliver positive measurable results. A result oriented and dependable person, an asset to any team and organization that he is a part. I am very happy to have worked with Sujith and with great pleasure would like to recommend him."

— **Amit Toshniwal, PMP®, CSM®**, managed Sujith at Sapient

"Sujith is a pleasure to work with because of his can do attitude and never hesitant to go that extra mile. He is always looking for better ways to accomplish and deliver the best possible output. He always keeps himself updated with the latest technological developments.He is very competent professional and follows "The tech" religion very seriously. He is superb at achieving goals before time and is a fine team player. Highly recommended .."

— **Karn Singh**, worked directly with Sujith at Sapient

"If you ask me for a person with equal command over technology and client requirement understanding, I will definitely recommend Sujith. As a marketing manager at Software Associates, I was not only impressed by his knowledge of ASP .net and Umbraco, but also by the fact that Sujith was able to foresee solutions for the clients using these technologies. I mean, anyone can write few lines of code, but giving it a human thought process, one should learn from Sujith. Last but not the least, Sujith is a very well natured person, and a good friend to all. I would definitely remember the time we spent togather at Software Associates."

— **Sheetanshu Shekhar**, worked directly with Sujith at Software Associates
